SUMMARY

Computer Science senior (3.77 CGPA) graduating in May 2026 with over 1 year of concurrent industry experience. Architected and built 12+ applications from scratch, successfully deploying 2 Android apps to the Google Play Store. Experience building modern Android apps using Room Database, Hilt, Kotlin Coroutines, Retrofit, and WorkManager with a focus on reliability and clean code. Proven algorithmic problem-solver, demonstrated by securing 2nd place in a regional Python competition and achieving a perfect 9/9 score in Harvard's CS50x Puzzle Day. Published a research paper on 5G and Advanced Network Architecture in SES Journal.

TECHNICAL SKILLS

Languages :

Kotlin, XML

Databases & Cloud :

Room DB, MySQL, SQL Server, Firebase, Supabase

Tools & Design :

Android Studio, Git, Postman, Figma

Android :

Android Jetpack, MVVM, Hilt, Retrofit, Work Manager, Coroutines, Room Db, Shared Pref, Google Ads

PLAYSTORE PROJECTS

AI Scripts: Video Teleprompter [🔗 Link](#)

- AI-powered teleprompter that scrolls scripts during video recording, supports front/rear camera, adjustable scroll speed, and font size
- Integrated AI script generator for captions, intros, and product descriptions with multi-language translation support

GPS Map Camera: AI Travel Info [🔗 Link](#)

- Stamps GPS coordinates, address, date, and time directly onto photos; supports 100+ downloads with real-time location data
- Integrated AI Travel Assistant to surface nearby attractions, destination highlights, and travel insights
- Built location management system with a grid photo viewer and saved-locations feature.

ENGINEERING EXPERIENCE

Minha Tech

Application Developer

(August 2025 - Present)

- Maintained and refactored existing codebases using MVVM and clean architecture, drastically improving code modularity and system scalability.
- Help the interns in achieving their goals, solve the real world problems and effectively write the modular and scalable code and effectively manage deadlines.
- Have 2 apps live on playstore.

Minha Tech

Application Developer - Intern

(May 2025 - Jul 2025)

- Engineered responsive XML layouts optimized for SDK 24 to 36, supporting both landscape/portrait orientations and dark/light themes.
- Integrated RESTful APIs alongside Firebase and Supabase, enabling seamless, real-time backend data operations

EDUCATION

Government College University (GCU)

(2020 - 2022)

FSc (Pre-Engineering)

Grade: A

Superior University, Lahore, Pakistan

(2022 - June 2026 - Expected)

Bachelor of Science in Computer Science (BSCS)

CGPA: 3.77

ACHIEVEMENTS

Programming Competition

Got Second Position in the Python Problem solving competition.

CS50 x Puzzle Day

Solve 9 out of 9 Problems in Harvard University Puzzle Day.

Publication

5G and Advanced Network Architecture: Challenges, Solutions, and Future Perspectives.
